## MYSON HI-LINE PROVIDES WARMTH FOR SENSORY CHARITY

“By donating a Myson Hi-Line Fan Convecter to the Scottish Charity SensationAll, it’s great to know that, in some small way, we are helping to improve the lives of children and adults with disabilities and multiple support needs,” says Kelly Smith, Solutions Product Manager for Myson. Installed in the new Sensory Room at SensationAll in Westhill, near Aberdeen, the Hi-Line will help to make sure that clients of all needs, together with their families, can receive amazing support in comfort and safety.

“We were successful in securing a Community Asset Transfer of the Old School House in Westhill from the local council, on the condition that we undertook the refurbishment of the building to make is suitable for our work,” said co-founder and trustee of the charity, Susan Kay. “We’re now fully engaged in an on-going refurbishment project which, because we are a charity, is having to be phased to allow us to do what we can when we have the funds to do it. Every donation, therefore, is vital. This Hi-Line will help us bring our dream of a fully refurbished building that bit closer.”

The Sensory Room measures only 4m - 3m so every bit of space is needed to help fit in as much sensory equipment as possible. The Myson Hi-Line fan convector allows the charity to make the most of lower wall space whilst maintaining a comfortable temperature to enable users and support workers to focus fully on their activities.

“We are a needs-led project with over 40 volunteers and 6 part-time staff,” Susan continued. “All we want is for our users and their families to enjoy socialising and accessing facilities that accommodate their needs and provide them with a safe and relaxing experience, allowing them some respite from the challenges they otherwise face everyday. The new fan convector means the sensory room will always be at a comfortable temperature, and there won't be any worry about accidental injury or burns, because it is well out of reach.”

William Wilson Supplies put the local installer in contact with Derek Cuthbert from Myson who arranged for a Hi-Line Fan Convector to be donated to the project. As a result, the Sensory Room was completed with the ideal heat emitter for free, so the service users and their families can make the most of their time together in comfort.

Kelly Smith continued, “The Hi-Line fan convector not only frees up usable wall space, it is perfectly safe for an environment like SensationAll. We're confident that our products will deliver unrivalled energy efficiency and performance for years to come, continuing to save the charity money for the longer term.”

Myson Hi-Line fan convectors are engineered to the highest standards and come with a 2-year product guarantee.
